

PHYSICIAN CONNECT REFERRAL HUB

Our Physician Connect Referral Hub streamlines referrals for you and your staff so you can save time on referral follow-up and focus on making sure your patients get the care they need. The Physician Connect Referral Hub provides a platform for you to send and track referrals to enrolled specialists in your area using technology powered by Phreesia.

Referrals are vital for making sure your patients receive the right specialized care, but the process is time-consuming and resource-intensive. The Physician Connect Referral Hub provides a simple, more efficient solution.

A Referral Liaison will provide your staff with ongoing support in using the Physician Connect Referral Hub to track and manage referrals, helping you build and maintain strong relationships with your specialists.

“Tracking each referral in Phreesia is crucial. When providers ask me about the status of a referral, I can answer them right away. This saves up to 15 minutes per patient case by cutting out the searching, calling and faxing.”

- Operations Manager, 187-provider multi-specialty group

WORKFLOW

1

Referring provider's coordinator submits a referral request online

2

Coordinator uploads relevant documents and chats with specialist's coordinator as necessary

3

Specialist's scheduler contacts patient and books specialty appointment

4

Patient and referring coordinator receive appointment notification

5

Patient arrives for appointment

6

Referring coordinator is notified once patient visit is completed
